

Tonkin & Taylor

Video Pile Inspections

Video Pile Inspections

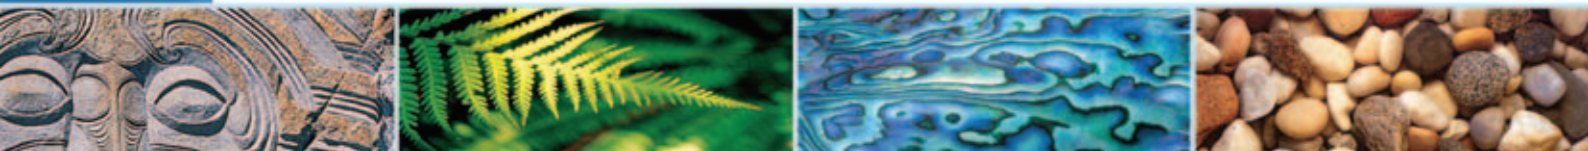

Tonkin & Taylor offers a Video Pile Inspection service using a high resolution colour camera and DVD recording with either axial or close up side wall viewing.

Expertise

- Pile inspections up to 2 m diameter and 40 m depth
- Live viewing through a LCD monitor
- Permanent record of pile inspections which can be used for presentations, analysis and reporting
- Alternative to personnel entry inspections
- Identify bedding planes, rock fractures and defects, roughness and condition of pile shaft and base
- Quick and easy to set up and use.
