Cambridge North - Structure Plan

Cambridge North - Structure Plan

Client

Waipa District Council.

Project

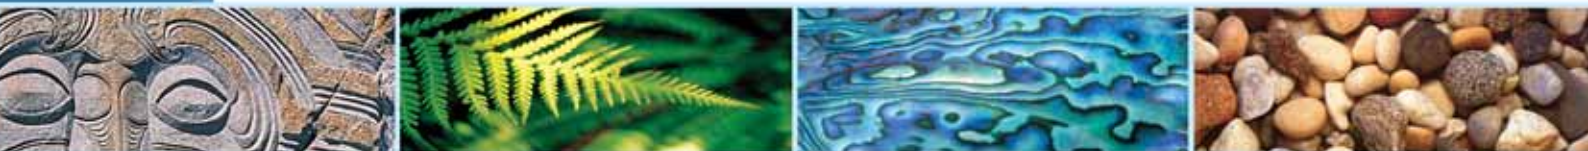

Preparation of a structure plan for the 1500 lot Cambridge North deferred residential zone that provided solutions for staged development of stormwater, sewage, water supply and roading infrastructure to allow development to proceed in this area in a progressive and orderly process. The structure plan has provided the basis for plan changes and for engineering design of infrastructure extensions and upgrades.

Services provided

- Demand analysis for water, sewage, and stormwater systems for the 1500 lot stage development
- Conceptual design for water and sewage reticulation and stormwater drainage and detention systems
- Consultation with landowners and Council regarding staging requirements
- Preparation of a structure plan.
