

Tonkin & Taylor

Dam 3, Kinleith Effluent Treatment System, Tokoroa

Client

Carter Holt Harvey.

Project

Conceptual and detailed design and construction management for the replacement and upgrading of Dam 3, an integral part of the Kinleith Pulp & Paper Mill effluent treatment system. The project also required design and replacement of the stormwater diversion system upstream of the dam, and effluent diversion around the pond and dam to enable desludging.

Services provided

- Options and feasibility assessment
- Geotechnical investigation
- Detailed design and contract documentation
- Contract management and supervision
- Commissioning
- Ongoing surveillance and technical support.
