

Tonkin & Taylor

Hydroelectric Power Project, Hawea, NZ

Client

Electricity Corporation of New Zealand.

Project

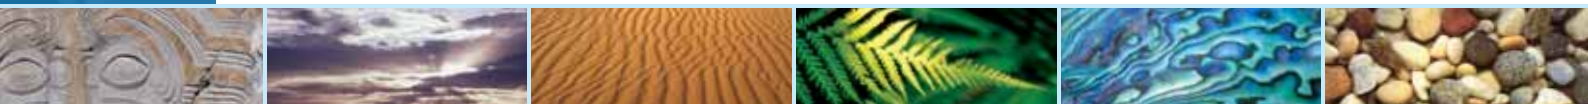

Prefeasibility and feasibility studies and geotechnical investigations for a two station cascade hydroelectric scheme on the Hawea river in Otago. The project includes the construction of a river intake and powerstation and hence diversion of flow to a power station on the Clutha River via earth lined canal to outlet back into the River.

Services provided

- Project scoping and options studies
- Prefeasibility studies
- Site investigation works
- Preliminary design and feasibility studies.
