

Power Sector Expansion Programme, Samoa

Client

Asian Development Bank.

Project

Technical assistance to Samoa to:

- Develop a comprehensive power reform program, including enhanced governance, more efficient management structures and a regulatory framework allowing private sector participation and sector efficiency enhancement
- Develop a programme to reform the EPC's internal business and management procedures
- Prepare an investment road map to diversify the country's energy resources, meet future load growth and reduce the burden of diesel imports.

Services provided

- Multidisciplinary project management
- Hydro power options and feasibility studies
- Environmental and social studies and services
- Sub consultant management covering regulation, renewable energy, governance and institutional development, power economist resettlement, power planning and financial management.
