

# Sprinkler Quarry - Industrial Landfill, Tokoroa

## Client

Carter Holt Harvey.

## Project

Assessment and characterisation of a 250,000 m<sup>3</sup> contaminated wood waste stockpile, options and feasibility study for disposal options. The study led on to conceptual and detailed design for construction of a landfill in a nearby disused quarry to receive the wood waste. Tonkin & Taylor was responsible for securing resource consents, completing detailed design, contract documentation and construction management and supervision.

## Services provided

- Stockpile contamination assessment and characterisation
- Options and feasibility study
- Geotechnical and hydrogeological investigations and development of models
- Resource consent applications
- Detailed design and contract documentation
- Contract management and supervision
- Commissioning
- Ongoing surveillance and technical support.
