

Upper Wawa Dam - Kinleith Effluent Solid Waste Disposal, Tokoroa, NZ

Client

Carter Holt Harvey.

Project

Conceptual and detailed design for a new 22 m high earth dam to de-water and store sludge from the Kinleith Pulp & Paper Mill effluent treatment system. The dam features a face drainage system to assist with dewatering the sludge.

Services provided

- Options and feasibility assessment
- Geotechnical investigation
- Detailed design and contract documentation
- Contract management and supervision
- Commissioning
- Ongoing surveillance and technical support.
