

Waimea Water Augmentation, Nelson

Client

Waimea Water Augmentation Committee.

Project

A feasibility study to enhance water supply to the water starved Waimea Basin in the South Island. Water storage is needed to provide a secure supply to the growing demands of the area. The study includes consideration of the Lee, Wairoa and Wai-iti river catchments for storage options and hence allocation options.

Services provided

- Project management
- Storage options identification
- Water availability and demand studies
- Preliminary design of options
- Environmental assessment
- Economic analysis
- Reporting.
