

## West Coast Hazard Project

### Client

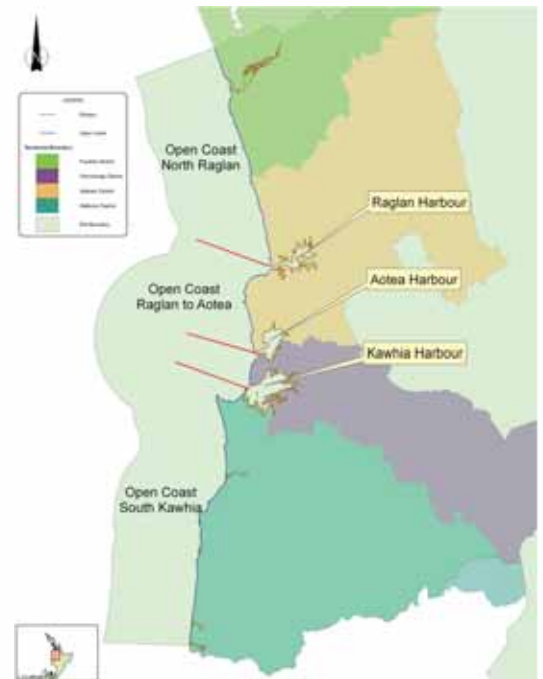

Environment Waikato.

### Project

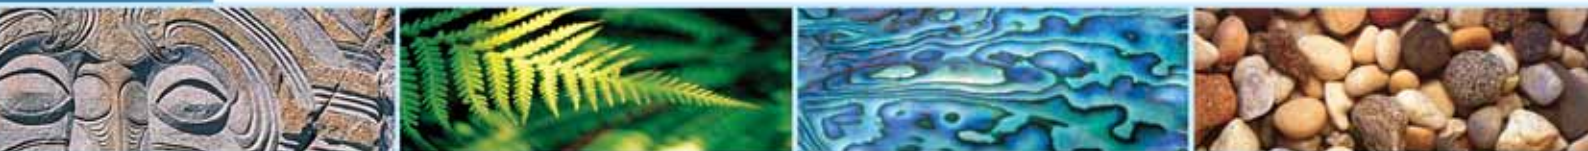

Environment Waikato identified the West Coast region as an area where there is little knowledge of coastal processes and associated hazards. Tonkin & Taylor compiled a team of experts to assess the state of knowledge available on the West Coast. Liaison with district councils identified priority areas in need of further investigation. This project forms a basis for future coastal hazard assessments along the open coast and within estuaries.

### Services provided

- Project management
- Review of coastal processes and hazards including:
  - soft shore
  - inundation
  - coastal cliff instability
  - mobile sand
- Identify gaps in data
- Prioritise hazard areas
- Identify future monitoring and information gathering priorities.
