

WestPac Head Office, Auckland, NZ

Client

Cooper and Company.

Project

Construction of the eight storey Westpac head office building within a 3000 m² historical block of reclaimed land in the Britomart Precinct. The development included a three-storey basement carpark, the design and construction for which had to address historical reclamation features, contamination and the potential for groundwater drawdown to affect adjacent Scheduled Historical Buildings.

Tonkin & Taylor's specialist inputs on the project included detailed discussions with Auckland

Regional Council to ensure the project could proceed without risk to surrounding structures and the environment.

Services provided

- Geotechnical and contamination site investigation - undertaken in a phased approach to accommodate the demolition programme
- Resource consent applications to the ARC
- Geotechnical and contamination specialist support during construction
- Geotechnical and contamination monitoring to meet Auckland Regional Council requirements.
